Heavy Metal Concentration Reference Guide (Non-Regulatory)

(All values in ppm) **Element**	**Common Range**	**Elevated**	**Above Threshold**
Arsenic	< 10	10 – 20	> 20
Cadmium	< 2	2 – 7.1	> 7.1
Lead	< 80	80 – 400	> 400
Mercury	< 1	1 – 23	> 23
Antimony	< 5	5 – 31	> 31
Thallium	< 5	5 – 25	> 25
Uranium	< 3	3 – 16	> 16
Chromium (total)	< 100	100 – 300	> 300

Thorium	< 10	10 – 30	> 30
Tellurium	< 5	5 – 30	> 30

Categories represent general approximations of common soil concentration ranges, reference data, and analytical method capabilities, and may vary significantly by location. This information is provided for educational purposes only. Reported values are subject to analytical detection and reporting limitations and may not reflect concentrations below those thresholds. This information should not be used for regulatory compliance, risk assessment, environmental safety determinations, or property, health, or remediation decisions. Consult qualified environmental or health professionals for any such determinations. See our full disclaimer [hyperlink] for more information.
