Hi Carson,
let's see what is in your dirt!

Element Breakdown chart

Measured elemental levels shown relative to a reference range.
This fingerprint is informational and does not assess safety, risk, or quality for any use.

Heavy Metals

Arsenic (0ppm) · Antimony (0ppm) · Cadmium (0ppm) · Thallium (0ppm) · Thorium (0ppm)

Oil Indicator

Crude oil: 220ppm

Petroleum: None

Precious Metals

Gold 17 ppm · Silver 3 ppm · Iridium 2 ppm

Rare Earth Elements

Cerium 31 ppm · Scandium 15 ppm · Yttrium 13 ppm

Give deeper below

Total Elemental Breakdown

Elements we found in your land

Big numbers don't always tell the full story. Some elements appear in higher amounts, while others—though smaller—may have greater significance.

Full List of elements at the end if this report

Detailed summary

- Aluminium (Al)
- Iron (Fe)
- Calcium (Ca)
- Potassium (K)
- Magnesium (Mg)
- Gold (Au)
- Sodium (Na)
- Silver (Ag)
- Lead (Pb)
- Oxygen (O)
- Yttrium (Y)
- Scandium (Sc)
- Copper (Cu)
- Other Trace elements

Other Trace Elements

Important elements in smaller quantities

- Manganese (Mn)
- Zinc (Zn)
- Boron (B)
- Chlorine (Cl)
- Molybdenum (Mo)
- Nickel (Ni)
- Cobalt (Co)
- Rhodium (Rh)
- Iridium (Ir)
- Selenium (Se)
- Thallium (Tl)
- Antimony (Sb)
- Bismuth (Bi)
- Palladium (Pd)

Precious Metals Breakdown

Precious Metals Present!

What's Unique About Your Soil

A Complete Breakdown

Iron is 50% higher than commonly found in soil samples

Potas. is 24% higher than commonly found in soil samples

Sodium is 9% lower than commonly found in soil samples
